

1st January 2025

To Whom It May Concern:

Sinclair has become aware of inquiries into the use of Mineral Oil Saturated Hydrocarbons and Mineral Oil Aromatic Hydrocarbons, commonly referred to as MOSH & MOAH in products intended for food packaging.

As a result, Sinclair has thoroughly reviewed our own products and can continue to assure all its customers that their labels are safe and comply with relevant legislation.

In regards to your request, Sinclair and our suppliers do not intentionally add Mineral Oil Saturated Hydrocarbons and Mineral Oil Aromatic Hydrocarbons as ingredients in our products; therefore, these compounds are not expected to be present in the final composition. We do not routinely analyze our products for these substances; therefore we cannot state that our materials are “free” from these substances.

Sinclair labels are manufactured in modern facilities with quality management systems in place, and in accordance with Good Manufacturing Practice

The information contained in this letter is provided in good faith and to the best of our knowledge and is based in part on information provided by our suppliers. Please do not hesitate to contact me should you need additional information.

Sincerely,

A handwritten signature in black ink that reads 'John Ryan.' The signature is written in a cursive style with a large, stylized 'J' and 'R'.
