

6th February 2025

To Whom It May Concern:

As the leading manufacturer of produce labels, Sinclair is committed to providing inherently safe and environmentally friendly products. Sinclair supplies food labels to the highest level of quality and food safety that comply with all relevant legislation.

Sinclair and its suppliers of inks, coatings and other raw materials do not intentionally add poly(Vinyl Chloride) (PVC) as an ingredient in the manufacturing of its products. Therefore, it is not expected to be present in the final composition. If this substance happens to be present, it likely would be present only at a trace level. Because we do not routinely analyze our products for this substance, we cannot state categorically that the materials are "free" from this substance.

The information disclosed and referenced above is provided to the best of our knowledge, based on the information provided by the relevant raw material and component suppliers. We believe this information is accurate and is offered in good faith. This information is subject to revision when additional knowledge/information is gained. Please do not hesitate to contact me should you need additional information.

Sincerely,

John Ryan
