

## Product Specification Sheet

### CS 90 (FP) - T113H & T628

|                                   |            |
|-----------------------------------|------------|
| Stock Code                        | PCS5890C-F |
| Polymer                           | RPET       |
| % Recycled                        |            |
| % Post Consumer Recycled          | 100%       |
| Unit Weight (g)                   | 20.00      |
| Unit Dimension (DIA / LxWxH) (mm) | 187X115X87 |
| Quantity per Box                  | 500        |
| Product Capacity                  |            |

#### Intended use and product or polymer limitations:

- These products are technologically suited for direct food contact, limiting HIPS for high acid content
- PET should not be exposed to freezers or cold storage < -18°C. When used at < -18°C, products lose impact resistance and become brittle. Inclusion of impact modifiers available upon request.
- PET products cannot be microwaved, nor can it be hot filled.
- PP trays and lids should not be exposed to freezers or cold storage < -18°C. When used at < -18°C, products lose impact resistance and become brittle. Inclusion of impact modifiers available upon request

#### Useable life and storage:

- All polymers and subsequent manufactured products should not be stored in direct sunlight for longer than 30 minutes nor stored close to any heat source, i.e. ovens and fans from fridges
- The product referred to above useable life is limited to the contents used, if unused and properly stored the products has no expiration date.
