

Product Specification Sheet

Z40 HEAT SEAL PUNNET III (NH) (17g) - T1332

Stock Code	PFT9002C-F
Polymer	RPET
% Recycled	
% Post Consumer Recycled	100%
Unit Weight (g)	17.00
Unit Dimension (DIA / LxWxH) (mm)	183X118X88
Quantity per Box	700
Product Capacity	

A Makhubele & K Louw
QA Signature

20 Jul 2026
Date

Intended use and product or polymer limitations:

- These products are technologically suited for direct food contact, limiting HIPS for high acid content
- PET should not be exposed to freezers or cold storage < -18°C. When used at < -18°C, products lose impact resistance and become brittle. Inclusion of impact modifiers available upon request.
- PET products cannot be microwaved, nor can it be hot filled.
- PP trays and lids should not be exposed to freezers or cold storage < -18°C. When used at < -18°C, products lose impact resistance and become brittle. Inclusion of impact modifiers available upon request

Useable life and storage:

- All polymers and subsequent manufactured products should not be stored in direct sunlight for longer than 30 minutes nor stored close to any heat source, i.e. ovens and fans from fridges
- The product referred to above useable life is limited to the contents used, if unused and properly stored the products has no expiration date.
